## **Features**

### **Plug & Play**

The simplistic design makes it easy to use. With the Plug & Play function, the Colonna is ready to go by plugging in the Custom USB cable to your PC or Mac. All you need to do is adjust the gain & find the right pick-up pattern for your personal environment.

### **Headphone Jack**

The Colonna incorporates a 3.5mm headphone jack at the bottom. Plug in your headphones and have full audio control at the tips of your fingers with the Volume & Gain knobs.

### **Boom Arm Mount**

No room on your desk for the Colonna? Attach it to boom arm that has a 5/8-inch thread mount so you can have more room on your desk.

### **Heavy Base**

The Colonna has a strong & heavy base to keep it stable where ever you place it. The cast metal is 0.8kg (1.8 lbs.) with a coated rubber bottom to ensure its placement on your desk.

## **Pick-Up patterns for all occasions**

### **Omnidirectional**

This pick-up pattern is for surround sound, picking up audio from all directions. This is very useful for when there are several people speaking or you want to move around in your recording space.

### **Cardioid**

The Cardioid pick-up pattern is ideal for individual use, picking up the audio from the front of the microphone and not the back. This enhances the recorded audio by excluding any irrelevant noises behind the microphone.

### **Bidirectional**

The Bidirectional is optimal for recording an interview. The pattern picks up audio from the front & the back while canceling the audio from the sides.

## Fine-Tune your settings

### Volume Control

Want to hear yourself or your recordings a little louder? The Volume knob lets you control the volume of your headphones that are plugged into the Colonna headphone jack.

### Gain Control

In contrast to the volume control, the gain knob controls the pick-up power of the Colonna microphone. Turn up the gain for picking up soft noises and turn it down for when in a loud environment.

### Mute Function

The Colonna also has the mute button on the microphone, so you can mute at any time without going into your computer settings.
