- Integrated with removable VESA plate for easy installation
- Integrated cable management
- C-clamp and grommet mounting options

## **Features**

### **Perfect For Any Setup**

It doesn't matter how many screens you have, the single monitor arm lets you setup your screens exactly the way you want. And with the single arm, all screen sizes will fit, you will only have to consider that the weight of the screen does not exceed 7kg.

Want to have one screen in portrait mode? That's a not a problem, you can rotate it to any angle you prefer.

Do you have different sized screens? With the single arm you have much more adjustability for each screen so you can set them up to fit your environment with ease.

### **Cable Management**

You have two slots on the arm for cable management. They will fit both the power cord and display cable without any issues. This together with the cut-outs in the Arena Desks will give your setup a very clean look!

### **Flawless Integration with Arozzi's Desks**

By mounting the monitor arm in the cut-outs of Arozzi's Arena Desks you will get a seamless look. We recommend that you use the grommet mounting option for maximum stability and to get enough space to run cables through the holes alongside the arms.

You can also mount the arms at the back of the desk. In those cases you can use the C-Clamp mounting option.

### **Adjustability**

The Alzare monitor arm offers many adjustment options so you can set up your monitors exactly the way you want them.
