Features

Extendable spring

Depending on how much you want the spring to bend and give in when you pull the cord. It can be adjusted in length. The further out you choose to have the spring, the more lenient it will be with your mouse and cable movement.

Rubber feet

Four rubber feet on the Ancora's underside keeps it from moving from its place. Works well on all surfaces.

Reliable Cord Holder

The cord will be attached in three different places of the Ancora, securing that it will not move or give in as you tug and pull on the cord as you're moving the mouse.

Weighted for Stability

Even if the Ancora might look small it is very dense and has a good weight to it. The weight makes sure the Ancora stays in place as you move your mouse around.
