

# SOFT PU™

SoftPU™ is a high-end synthetic leather composed of 100% polyurethane on the surface, with a backing made of 71% polyester and 29% cotton. This combination provides a material that is both durable and soft, offering a sophisticated look and luxurious feel, making it ideal for both residential and commercial environments.

Known for its excellent tensile strength and tear resistance, SoftPU™ is built to endure everyday wear and tear while maintaining its comfort and smooth texture. Despite its durability, it remains soft to the touch, ensuring a pleasant seating experience for long periods of use.

SoftPU™ is also incredibly easy to clean. Spills and stains can be wiped away quickly, keeping your chair looking fresh. For best results, clean spills immediately using a neutral soap solution and a soft cloth in gentle circular motions. With proper care, SoftPU™ will retain its stylish appearance and long-lasting durability.
